Rec'd Febr 6th

Jan'y 24th, 1849.

Dear Dr.

I have had this sheet for several days — waiting for time to write to you in reply to yours of Decr 21st & Long's. — By the last date you should have received one of the sheets of Pl. Fendl., I sent you. I have now set up to p. 72. (I want Stokesia especially)

I inclose Pickt's list — making 6 plants I wish printed. I will send anything we have I endose for you a piece of the new Crucif. plant I have to mentioned the name of the Crucif. plant I have to mentioned is Arabidea!

I find I have Cryptanthe no. 133 Nat. Ord. only a very little but you sent in a letter — I think after my examinations were made. I saw what I supposed to be your characters on the sheet — No. — the bit I have I find is what you sent in the letter I am answering. I had it not before. unless I have misplaced it among the Mimosæ. — Yes, there I find it, indeed. flowers inconspicuous — I never looked there. No doubt distinct. — Never mind, revise the genus in Pl. Lindh. — when the genus comes in naturally.

You will see that, by over sight & condensing what I had put in the first sheet. I got in all your intend. to Pl. Fendl, except the references to plates. —

Halstead I believe has nearly decided to go on the Panama Rail Road Survey. — I trust to get Wright attached to the Boundary Survey. I have a letter from Fendler in which he expresses his willingness to go to that Salt Lake country. If he can get government protection & food, — etc — in a few days I shall write to Marcy. — and him the sheets of Pl. Fendl. — &

0 1 2 3 4 5 6 7 8 9 10
cm

MISSOURI BOTANICAL GARDEN

make a vigorous application for this aid. No doubt I shall get it. I think. But perhaps it might be almost as well for J. to go over with a party of emigrants direct to Mormon city. But probably Stone will be emigrants bound for the same place, accompany the Regiment — as near as they go. Fowler can do admirably well in that region. If he possesses. But will he not take the gold fever & leave us in the lurch? Will not living be very dear in Mormon city alto? I fear it. I must leave much to your discretion. Only if you think J. has a strong tendency to gold hunting (which for cold resist) let him go. And afterwards — if he shows to collect plants very well. For can withstand the temptation when fairly within the infected region — & give bear the Mormons have found gold also. —

The check I send is $10. for Tuckerman for Lichens & $27. for Prof. Blanchard. (I see I have not taken out the share of Wright & perhaps I made B. pay — for that $1.50 & it I should have retained). —

There must be some mistake about Endlicher. I have not seen his name mentioned, tho you see he is killed, or in trouble even. I think the democrats & Vienna & Berlin have acted like fools & madmen — & have thrown away the great advantages they had for establishing liberal institutions.

I fear the Asclepias ell. 183 must be with Torrey who has long had mine. What are those of Lapham which I asked him to send you? It will not be until April or May that I can return the printing of Pl. Fendl. (my paper of 100 pages has cost me 6 months hard labor!!) — Shall I put (next that)

send back to you all / your Mss a Holstead. - that you may revise - And if you choose to cast them into the form of a paper for Mem. acad. - I will print that as soon as ready - & copy your drawings on stone. It can be prickly done at bankside now. - Sr of Euphorbiaceæ

alter. - Your new remarks on Loranthaceæ came too late I sent it to press - as well as I could on Christmas day I have taken pains to say little that will need to be unsaid. - You can revise all for Pl. Lindh. - with such additional information as may turn up. - Will I send back your remarks in your two last letters?

Fendl. 431 & 437 - must pass. - nothing distributed it is no matter. -

I have no parcels to return to you. Vine cat. - Engr. - Visit 2 - & the Mem's acad. - Pearl I send to - what is his name - at Pearl St. Nutshell? I have little doubt that at the Lick - will do all that we ask for Fendler.

Emory says you have recommended Halstead for Botanist on Boundary Survey. - Write to him in favor of Wright. - The parcel brought by Halstead reached me last Saturday - Thro. He has been back a month!

I conclude to send back your Mss as Pland. If you have got the materials you want. H. - why not make a little paper for our memoirs - with figures like those sent - I will get them nicely done on Stone & print at once. - We shall have 100 copies for distribution - Yours ever truly

Asa Gray

Dear Engelmann

This evening your parcel containing Gordon's Plants came in time along with the proof of sheet 13. Pl. Fendlerianæ. which contained Actinella, etc. — just in time for me to add to the Actinella descripta. Jour. Hort. Soc. Lond. — & Fremonti 2nd Coll. a fine B. Pygmaea. which is Gordon, No. 54.

His no. 55 = Actinella acaulis.
" " 56 = A. Torreyana. I now think but in Pl. Fendl. Hook. I reported it as A. acaulis. var. —
" " 53 = Actinella (Hymenoxys) odorata.

" No. 4. Verbesina Nuttallii, I take it. (a queer potter with with an imperfect dried specimen I have.)

" 5. V. Engelmannii.

" 79 Leucocrinum.

" 72. What is it?

" 6[illegible] Scutellaria pectinata. Jour.

" 21 Astragalus Missouriensis.

Alex. Bowdoin Jones. Emory has been
here. — made a good arrangement to take
Wright as assistant computer (nominally)
But the St. L. State voted it.

Had not Fendler better go at once
with the earliest party of emigrants who
go direct to Mormon settlement. —
He ought to reap a fine harvest there.
Times will be better. — & as I study &
publish the Plants as I have opportunity
they will be raised in value, & will be
in demand. — The Garden does
Plantes pill publicate — I think. —
There are some typographical errors
in the N. Mex. published. I will
correct with a pen in the extra
copies — of which I have a good supply
— & which will cost Fendler or us
nothing. —

In great haste —

Yours ever —

Will write soon again.

A. Gray

Rec'd March 16th
Ans. March 22d

Cambridge Feby 24, 1849

Dear Engelmann

You owe me one or two letters. — all in good time.

Mr. Lowell has been asking after Fendler, and how soon he starts — expecting great expectations from the Botany of Great Salt Lake & that region. Dive up in Fendler's beautiful specimens.

I sent the Pl. Fendl. (all marked to you that is marked) into the hand of a young friend to Marcy at Washington, with a letter asking for not only transportation & protection — but rations also for Fendler — I have an early note in reply that Marcy was sick — put the chief Clerk agreed to lay it before him next day — the clerk said Summers

that it would not be in the
Secretary's power to grant rations.

Protection & transportation we
will have, out of this or the incoming
administration; — and it can be
sent on hereafter. If Morrow Cater
sees it will not read it, and his summary
work will be in that neighborhood.

If Handler goes at all, he
must decide whether he will go with
the troops by the Platte, and find his
way to his scene of operations as he
can, — or join some band of emigrants
who take a southern route — in
order to bring them to his stations.
as

In either case, you can draw
on Mr. Lowell for $200; and
when on the ground he can readily
draw, as he needs, on you at St.
Louis, or Mr. Lowell at Boston.

I am waiting for the Act of Platte
(His own Election): I have ordered to

St. Leman. Loudon — who will probably take it. Bennett. A

~~Asa Gray~~ British Museum speaks most highly of Prof. Gray. Plants — duplicates from the same & like regions — sent him the past season — he reports his sets did not hold out quite — so many revs. missing.

By the steamer now due at Boston I shall probably get pay for ser sent to Harvey. —

Asa another matter, briefly. — The Secty of State & the Commissioner have behaved most shabbily. — Wright cannot go on the Mex. Boundary Survey.

Lowell, Greene, & I have got up an expedition for him that will do as well, — & on which he is going right — If. — to Texas, in time if possible to join the troops which Gen. Smith is sending to Fort Paso del Norte by way south

directly across from Fredericksburg — if not get across by best chance he can, Pittsburg or the Rio del Norte & especially in the mountains right west of S. N. this summer — Winter or go down to Chihuahua — & back to Texas — & another year try again — perhaps get up to Santa Fe & the mountains there — or go further west towards Calif. along the boundary line.

Find out who is to command the troops at El Paso — and if you know him write to command Wright to his care. — In case any trades you know going to N. Mexico.

Any instructions you wish to give Wright about bacteria etc — write to him at Austin. I care write to Col. Blaisdell Kyle. & he will get letter.

The two points we may now occupy are the two best foci in N. America — to work from.

I hope much may be done now. —

By this time you shall have the clerk in

my letter of Feby 16 —

Sunday Evening
25. Febr. 1849.

Dear C.

I have just received from the Secretary of War Mr. Marcy — and enclose to you, what I think will procure all the facilities that Fendler can wish from U. S. Troops. If, as I was informed the Sec'y. has no right to issue an order for rations to F. — he has certainly done the best thing by issuing a recommendation which will (if the Commander is favorably disposed) enable him to give all, without any order — Indeed I think we could ask nothing better. —

Now another matter. —

MISSOURI BOTANICAL GARDEN

Recd April 5th.
Ans April 21

Cambridge. March 24th. 1849.

My dear Doctor,

I received your letter of March 4th. a day or two ago, & this morning yours of 8th., how my letter of Feb. 16th. came to be post-marked Baltimore, I cannot imagine -

On Febuary 25th. I received from Washington letters from the Secretary of War, & the Capt. of the Mounted riflemen, recommending Fendler to his protection, &c. which I at once forwarded to you, with a letter in which I told you that Mr. Lowell would honour your draft for £200. for Fendler, in case he followed up the plan of going to the Great Salt Lake. — And March 10th. I again forwarded to you for Fendler, another remittance of £83.60 for Lindley's set. - The particulars of the account with Fendler I will send in my next, & clear up all your queries.

The sheets of Standley & Fendleri and have all been forwarded to you long since, also a complete copy; & a few days since I forwarded another, & one for Fendler.

Mr. Lowell has always felt the greatest interest in the Expedition to the Salt Lake & great willingness to subscribe for it, but has always strongly objected to the California plan - And as one had received the papers

from government & your last letters pointed that
out I supposed that the Mormon Expedition was
agreed upon & therefore forwarded to you Mr. Nuttall's
draft on Durand & Mr. Lowell's authority for his
draft.

But as Fendler seems to have set his heart on
California I suppose that must be given up - But
I do not think Mr. Lowell will be willing to advance
anything for going there - For when a combination of
the two was proposed, he objected to it, & earnestly
hoped Fendler would not be cajoled with the gold fever.
But as Fendler is determined to go & dig gold, & seems
an enterprising man, it is about the best thing he can
do; for he must needs, with energy, certainly make
more at it than he ever can with plant-gathering -
So probably he had better go - But I do not see that
in that case he can use Mr. Lowell's draft or Nuttall's,
they must be reserved for Wright, if afterwards he
should attend this Expedition to the Salt Lake -

I am the more sorry the expedition must need,
be given up, because Hooker in one of the last Journ.
of Botany again notices Fendler's plants & recommends
them to Subscribers, & also recommends to them his
new expedition to the great Salt Lake, which he
mentions —

MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

I have taken another set of Fendler's plants myself for a correspondent, valued at $26.00, & for which I will account in my next remittance. I should be very glad to help you if I could in advancing money, but at present I am ~~rather~~ much behind hand myself; the General has eaten up all I can lay my hands on, & as yet I have only received the half that it cost, & a second volume is in preparation, with all the contingent expenses. But if you can raise enough to get Fendler off he can from a distance draw either on St. Louis or Boston & by that time foreign receipts will be coming in. The next steamer will bring Harvey's remittance for Oakes' set. Or if he will collect a set of plants on his way out & send those on with them in my hand I can apply to Dr. Lowell. But as he has lately advanced for Wright's journeys, & been laying out a good deal in other ways for the science it is like buying a willing horse. Especially after the disappointment of the giving up the Expedition

Wright is just off for Texas, trying to overtake Gen. Worth's or some of his people, & going from Texas through to El Paso, the plan is to keep them about there a year or two, & then, perhaps, we can get them across to the Salt Lake

I hope you have seen Major Kendrick & given him instructions.

I have been hard at work 6 months on Plantae Fendlerianae, & if my time had not been so occupied by that, might have been doing something, that would perhaps have enabled me to help advance money for Fendler. But I think I have about done my share.

MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN PAPERS

MISSOURI BOTANICAL GARDEN

As to Acl. & Euph. I would do them as you first proposed
Fendler's own set is to be offered to Lemaire, London. not
Lehman, Hamburg.
The Phil. Acad. seldom buys anything, & I shall not
wait to offer it to them.
To-day I shall enquire in Boston about goods going to St.
Louis — Gordon's set & the package by Holsted have been ack-
nowledged & money for Lowell's received & forwarded, as see by
my later letters —
I have long since put back all Fiyer's sets from Riley
in New York; but have never heard any thing of the
London ones — I will try & get an account from Riley.
The $24.60 due Mrs. Lowell, & may run on toward Californian
plants hereafter —
I distribute A. Findl. to all the Subscribers & Friends.
Tell me how & I shall address a lot of copies to send to
Braun, (I will send my Review, when it is) & to whose Care at Bremen — I have up a
quantity to bind together with the 2nd. part, as a thin
volume — if you add Acl. & Euph.
If you add I will look at your Communicate —
Bright will be on the best part of Emory's route.
Q. Missouriensis & macrocarpa are distinct, I believe,
I have both growing, both Silvery in certain States —
Torrey long since shewed that true Eleomella
Mexicana was different from our Texan; we have known
the three sp. two from boulder. I believe Torrey has given names.
Thanks for the determinations about ferns, which I will
Save up.
Yours ever truly
A Gray

2 to Braun & 2 copies — for the Cercis, Key Lab. Faculty. Regents. Assist. Secty

Boston 10 April 1849

Dear Sir,

I have received your letter of 30 March advising me of a draft of $200. on account of Fendler's new expedition - which has been paid -

Dr. Gray mentioned sometime since that you wished for specimens of some of our New England plants - If you will send me a list of what you are deficient in, I will with pleasure send them to you, so far as my duplicates will allow -

Yr truly & respectfully

A. Gould

Ans^d May 12

Cambridge. 28^th April ~~March~~. 1849.

My Dear Doctor.

Your last was of the 28^th March - a month ago - and was duly received. - Since I have a very pleasant and sensible letter from Major Kendrick - for all that goes well. - I was glad to learn that Fendler had at last made up his mind for Mormondom & Botany - that is. I am glad if he will be contented. For it was natural he should take the California fever. & I could not dissuade him from that undertaking - as I wrote in my last. - I trust he is now on his way, under favorable auspices - Mr. Lovell tells me he has paid the draft in his favor for $200. I have since received the pay from Harvey (Oakes's set, at first) ~~——~~ $31.20
for which he had added 10/ for the Boston- 2.50
(One quart are viz. Hypnums. he says - the rest $33.70
like most of those spoil in drying three comm. -
This $33.70 - I will probably remit. or you may draw for it.

As to Lindley's I sent all I received viz. $32.16. - Before I suppose Harvard deducted a commission - charged his commision to the purchaser. -

We will, of course communicate exchange on plants got by Dr. Collectors. Wright is in Texas, by this time. - in team to join Wislizenus's party across to El Paso -

MISSOURI BOTANICAL GARDEN

I have been expecting your box by Express containing the full set of Sandler Plants (his own set — with plants & seed) from Lindheimer you spoke of (time they were done). I want to send on the Sandler set to Ludwig — not to St. Leman (thought via St. Leman of Ludw (a diff person from Prof Lehmann of Hamburgh) — — who after all as my sending him Pl. Lindh. & telling him (as he would not take the sets on sale in Ludw but wanted a fuller one) that I would send him this full one for about $100 — ~~declined~~ wrote me a rather shabby letter declining.

But Booth later wrote me that if I would send on right away Mr. Brown would take it for the British Museum; so I want it much — & wish it were here to go by this next steamer. —

In my haste, & multitude of business I have shabbily neglected to send the copies of Pl. Sandl. to Hamburgh for Braun. And now the Danes have blockaded the Elbe — But I will send 12 I have laid out (it makes a heavy bundle) either by Sailing steamer to Bremen (I wish I had one to address to there.) or in a box for Paris. Intended to — I am about to consign (remains of Academy) to Delessert & Co — House — & advise Braun by a letter. Delessert & Co. Would not the latter be best?

I have inquired for a chance to get my packages on board for you into boxes of goods for St. Louis — but

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

without success. The Cattan men send only whole cases — ready packed at the mills —

I think I shall now send the smaller things by Express — & retain the 3 vols of Memoirs for some opportunity less expensive —

I immediately mailed a 2d complete copy of Pl. Fendl. for you — Hope you will get both one time. The want Paid — rec'd all the way to St. Louis.

If I had your paper on Euphorbia — & Asclepiad. I could put it to press & ans in Memoirs — & engrave your figures.

I am crowded — overwhelmed — with work — But College — work will be over in July. & 2d Vol. of Genera — which I am now hard at work on — will soon be ~~all done~~ printed off. — a week more & I shall have finished the copy! —

I must then work at Explor. Exped. (Euphorbiae & Asclepiad. & Pendl. & (when the sets arrive) also at Lindheimer — If you wish — (I have made a genus of the Texan Rue — between Ruta & Asplophyllum = & Ruta-sima. — I think there are some good reasons you will like in the 2d Vol. of Genera — & College work a year hence — I foresee an unusual good chance to get rid of College & must therefore try to overhaul the Expl. Exped. Plants — so as to get them into some shape — & next year (May or April) go abroad with them — get down in London & Paris, & work them off,

& Lindheimer. —

— I want you to help me a little about Trees — our native trees up to Kansas inclusive — for this year — for the Report I have promised the Smithsonian Institution

I wish I had a good assistant, - one who could
work at Botany. Perhaps I can find one always.

In haste Yours truly

A. Gray

Rec'd May 13th
Ans. May 13th

Cambridge - May 2?, 1849.

Dear Dr.

Your box came just as fast as your letter of the 19th. Both reached me to-day. I have not yet opened the box: shall to-morrow *. Pity it did not come 2 days earlier - ~~to be despatched by steamer~~ was to-day by steamer of to-day. the seed to Watson & the parcel of Fendler's Plats to Brown. - will send by next steamer.

I trust Fendler will do finely. I saw by a slip in a newspaper that Col. Stark is to send a party to explore valley of Great Salt Lake, under Capt. Stansbury. I have written to Washington to enquire & to say that Fendler should be attached to any such party.

Why did you not give me Mr. Northrop's address? I have sent Pl. Fendl. to Mrs. ... of the names you mention - I will to the rest till the 2d part is printed off - then send up as a vol, + charges $3,75 - about the same as for a pound

* I had 250 extra copies - but only 100 done off. (nearly June - I will send you 2 or 3) - Doing

But what I want to write you about to-night is this. — I send you (mail) 3 fasc. of Linnæa for 1848. — (They belong to Sullivant. Send to him as soon as you are done with them) by which you will see that one Schede has been getting into L[indheimer]'s yet undistributed coll. of Plants, and has been playing the deuce with them. His names must be known. Pray send me your remarks — Some he has put well, & anticipated names I have in print — as Abutilon hebostachyum. which in sheet of Flora printed off I had called A. velutinum. — His Paliurus is a Zizyphus, etc.

How came Lindheimer to send them? — I do not care how many of the species any body describes, but I do not want to have them published on both sides of the Atlantic under diff.t names — —

I have only got the Linnæas to-night & put up set (& Sullivant's) for you — without looking it over. ~~Appoint~~ Please notify me of the safe arrival of the Linnæas —

I write three or four days

Yrs very truly

A. Gray

Rec: June 1st
Ans Aug 6th

Cambridge 23d May 1849.

Dear Doctor

I have your two letters of 12 & 13 Mar. —

If you have not yet sent off the Linnean to Sullivant you need not. — for Sullivant is coming on the 1st June & can wait for the paper.

I saw a paragr. in paper about Hansburg's exped. & immediately wrote to Prof. Henry at Washington to request Col. Abert to have Fendler attached — Henry said he thought it would be done. Hansburg has probably not taken time. I doubles you have arranged with him to take Fendler up. — He can probably sell his artist, or Hansburg will take it for use of U. S. — & pay him the cost. — This all looks well.

Truly St. Louis is a great focus. — the starting point for the whole western world. — all your mail-road to Boston. Maynard want is a rail-road to Boston. Maynard

Please give from Chelsea. —

We must publish Lindheimer's Plants. I hoped to have a numbered ~~set~~ distributed set to compare as I work on them: for I fear I have got the nos. in confusion — as to order. — Of course each specimen is kept with its own ticket. But I

how the rest of distribution runs: clearly.
As soon as you will furnish me with what
you have done & will do. I will have them
in hand up to the end of Oct[obe]r — at any rate.
I have just written the last on Gen.
Ill. vol. 2. a great job. Your
3 of the plants in it Schuele has got. —
but not all. His Paliurus Texanus = my
Zizyphus Muricatus. — His Malva anisatissima
= my Malvastrum Mysticum. Abutilon Darwinia he has anticipated." —
Thanks for your notes on Trues. —
I must now work Darby on Expl. Expd.
plants — College — work will be little after
middle of June. — I'll not be idle. —
Asa Gray is sending to Braun via Hanover.
To him I have given a parcel containing 12 copies
of Pl. Fendl. & 3 or 4 others addressed to Bischoff & the other
botanists you mentioned. Please advise him. Englicher
is gone. died the beginning of March of a sudden illness.
I have written to Silliman for your bill which I
shall pay, & remit to you any balance in my hands —
Fendler's own set has gone. I suppose you know, to the
British Museum. I hope to get pay for it very soon.
The collections made this season we must publish up very
promptly. In haste — Yours ever.
A. Gray

My Dear Doctor

I congratulate you on getting through with the cholera - and rejoice at your preservation. It is long since I have written - being so busy myself, & knowing how much occupied you were - The last fortnight has been lost to botany, by the Scientific meeting here - (interesting though - I will send you the proceedings when printed ll). Prof. Henry, the Secretary of the Smithsonian - President of the meeting, and my good friend has been staying with us till yesterday. He will take interest in our Scientific operations. He heard with much interest that part of your letter that related to the misfortune of Fendler (as also from Wright, who is having a hard time on the way to El Paso), and will render efficient aid, by subscribing $150, or at least $100 to his Salt Lake Exped. payable after Jany 1. 1850. & probably continue such subscription for two or three years. - If needed. He will wish the account of the Plants of this Exped. to be published in the Smithsonian Contributions. He will publish a Manual for Travellers & Collectors -

0 1 2 3 4 5 6 7 8 9 10
cm

MISSOURI BOTANICAL GARDEN

get up by a number of persons, who will write the Dift Departments.

I have not yet seen Mr. Lowell to read to him the account of poor Hawkins losses & your plans, which seem to be judicious

I have not yet heard from the set Hawkins own sent to Brown pr Brit. Mus. But if I do not hear by next steamer - (in answer to my message lately sent) I shall write a very scolding letter to Bartlett & have it read to Brown. I have the plants returned (for Smithsonian list) & the money part grant pension

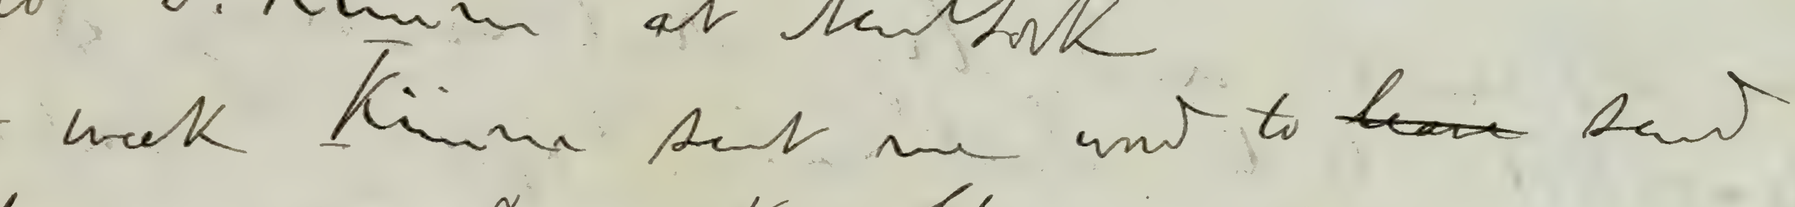
had pt proceeds from Webb. & the ~~Swiss~~ all- edits be sent to Switzerland.

It is full time that Howard

I have been exchanging my accounts in the matter and am sent enclosed send statement.

From which it appears that I owe you $70.98. This sum I sent to-day to T. Kinnan at Sandusky

Last week Kinnan sent me word to ~~have~~ send any thing for you to Saml. K. Chase the very next day I sent - but he gave no address - could not find the name in the Directory - - & [illegible] was obliged to take the alternative he gave and send to Sandusky to S'pies, Church & Co. - which I did - advising him by mail. The parcels were two. — one contained the



3 vols. Memoirs Amer. acad., for which I paid $7.00
The other, Compositæ Greggianæ; — Pl. Wrightianæ,
& the part of Pl. Fendlerianæ — last from your bro=,
that were studied — New Genera Illustrata. vol. II —
from Mr. Lowell. I paid expenses to New York &
hope they will safely reach you.

Dana of New York has to pay $10 me — & I have to
pay $10 for you for Silliman Journal, last year & this. I want
to have attended to this & that it could come into
this account standard. — When paid I will send you
their receipt.

Many of your plants in flower. Talinum calycinum
by side of T. teretifolium — quite distinct. — Stevia Ker=
mesiana (which I think is not a true Stevia — will see
soon) Cosmidium gracile, etc. etc —
Take up Hooker's Crocus & hope returning them.
Study them this autumn. Lowell & I will take the
plants from Gregg you speak of, & divide them; sharing
the cost. Lucile to pay $10. or hundred —

I wish you would send me Lowell's set of Lindheim
plants — as far as laid out — Mine have got so dis=
arranged & part distributed into my herbarium &
part not — that I can hardly make out of
noticing all without a set to go by like that.
You do up the asclepiadeæ &c — for Linds. &
Fendl. My work has got on slow as yet.
Not get through with first study of Compositæ of Ex. Exped.
yet.

have got to work hard enough yet! Very much to do that is pressing).

I have none of the Portulacas of Lindh. you sent us P. pleurospala — maculata — lanceolata. — Lindheimeri I have flowered finely this year & last — A fine Calliandra — (Gregg or Wislizenus!) very showy, is now in flower.

Ed Abert is a selfish, shabby fellow (Sturtevant says as much) and Stansbury another, no doubt. Henry will go directly to the Secretary of War, for help therefore and through him, we can I hope get some medical facilities from Washington. But we must be as independent of Government as we can —

Great place, St. Louis, no doubt.

As to Agassiz: I have not spoken of him, because I have not had time to write you half what I wanted to even of Botany. But I will say that A. & I always get on perfectly well — tho' perhaps we might not if we worked in the same field: yet one who understands his impulsive character ought to have little or no difficulty. — We continue intimate friends, & he remains very popular here.

If you can have asclepiadeæ &c ready as a memoir I can publish them in present vol. of Academy Arts & Sciences.

In Smithsonian Contrib. Henry will give plates — as many as ~~you need~~ we need for Gentiana. Mitella &c. — hereafter. Have you a set of Lindheimer Texan Plants &c. as full as possible for Smithsonian Institution. In haste, truly thine — Asa Gray.

MISSOURI BOTANICAL GARDEN

Dear Si,

To save you the trouble of answering my note this morning about the Texan Compositæ, it is Lindheimera Texana described in Lem. Acad. Memoirs — I particularly noticed that the achenes of the ray were carinated along the dorsal surface & the carina produced into a reflexed process —

Yr. truly

A. Gray

Boston, Oct°. 12. 1849

My dear Sir,

I return Dr. Engelmann's letter — I pray that no demand may ever be made on Fendler, nor anything deducted from his remittances on my account. I shall be glad, however, to receive a share of his new collection.

~~I retain you note of reference~~

Some of the seeds from Engelmann have vegetated with me. A solanum with prickly calyx investing the berry; one of the Chenopodeæ, probably Kochia with a round disk under the calyx — some portulaccæ very like oleraceæ — a composite flower, with 4 or 5 yellow rays, which are fertile — the achenia compressed, winged & two awned — the disk

flowers with a new coronifera Sophy
& perhaps sterile — I have had no time
to look them up. —

Yours truly

A Lowell

Cambridge, Oct. 1. 1849.

My Dear Doctor

You surely must have my last letter, in which I presented a statement of account of Fendler plates — and told you I had remitted to Gov. P. Putnam 155. Broadway. New York. the sum of $70 98/100. payable to Th. Kinnan. or order. & I wrote to him to New York (missing him at Boston — as I explained) telling him to call on Mr. Putnam for the money. I did this because I could not be sure that my letter would reach him at New York. I now fear it did not: for Putnam wrote me some while ago that the money was still uncalled for. Mr. Kinnan can draw on Mr. Putnam for it. (George P. Putnam, Publisher) at sight, which will be the readiest way for you to get it — and doubtless will pay over the sum to you.

I long to hear that Fendler is on his way back. Not having seen Mr. Lowell I have not yet informed him of Fendler's mishaps. I will when I see him. I told you that ~~Prof.~~ Prof. Henry had agreed to appropriate a sum towards Fendler's explorations. after January next. That, with Mr. Lowell's next year subscription — & what we may get from abroad should keep him in the field for the present. Last Steamer Dr. Boott wrote me that Brown was in Scotland —

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

having me from London for fear of the cholera.
— He will get my request as to return — and I shall write again — to him directly for the Mss due to Fendler — stating the great need for it.

Have you got the packages sent to Spruce Christ Hos. Starbuck, as Mr. K. directed —
and how do you like the 2d Vol. of Gaudichaud?

I now work a part of the time at Linden Lean Plates — beginning with the Compositae — & will go back over the families of Polypetalae which you do not yourself work up. & then on with the rest.

I know not how you have arranged the mss for distribution. and want a list much to aid me — hope Mr. Lindley is on the way for that purpose. Shall I take them up all in a regular series, & cite the distributed nos. in brackets, as in Pl. Fendl. after the beginning of Compositae.

I think, also, I have some of the printed form of tickets except for 1845 etc. (a batch of tickets you sent us specially — & for the 1849-51 I should like to do up & print all those.

Let me have mss of you —
Bros.
I have no botanical news of interest —
Yrs ever ——

Rec'd Oct 26th
Ans same Day

Cambridge, 13th Oct. 1849.

Dear Engelmann.

Receiving yours of the 25th I went into town as soon as I could to have hope Mrs. Lowell — Not finding him in, I left it, with your former one — and received in return, the enclosed, written in his usual laconic style.

I think it would be well to present him — not only with a set or mine of what Fendler gathered on the Plains — but also with a set of Greggs which you spoke of. — For mine I will willingly pay a large part of expenses ~~they~~ incurred on them.

I have fixed up the Compositæ of Lindheimer collections (the only one absolutely new now is 628 (1847-8) = Keerlia effusa. — quite interesting one, showing affy. to Chætopappa.) & I am now working — some every day — at the Polypetala — Let me know what families, besides Cactæ you will elaborate that I need not work over them. When I get one of the sets I can regulate the numbers — which I cannot arrange till then.

I imagine that Philadelphia furnishes better Medical Schools than ours — and that it is perhaps cheaper living there.

Very much interested in what you say of hybrid oaks. —

I raised only Pentstemon Jalisanum calycinum — which already flowered before I had to take it up — will flower this winter. I had it beside of T. laevigatus — it looked very different. T. pari flowers I had not. What do you call the Texan one prostrate — with shiny or ovate-lanceolate leaves?

No more of Schuele.

Let us have all Lindheimer's plants as soon as we can. —

In haste Yours truly

A Gray

Engelmann.

No. 412. (1845) Victoria — a tomentose Malva-
ceous plant, only poor flower-bud & no fruit.
Tell me the structure of its pistil, or seed
or flower — or a young fruit — if any.
Is it Malvastrum? Sida? or Abutilon?

Portulacaceæ — I leave for you to finish
and descriptions. —

Your P. oleraciodes (is that the name?) I did
not raise, but Mr. Lowell did. & has just
furnished me with poor live plants. W. like
my wild specimens from Texas, Mich. — is really
distinct from P. oleracea — by leaves perhaps more
narrow — the calyx circumscissile so as to leave a
saucer-shaped border around the capsule top of the capsule.
& the much more muricate seed. —

Linum Berlandieri = La chat mil. Where is
581 (1847-8)?

Lin. 461. 1845, shows stipular glands
L. Berlandieri shows traces of glands

Send a good set of Pl. Lindheimeriae
to me (soon) for Prof. Harvey for Dublin
University Museum,

" Vitis rupestris, Schule. you refer to 358
[= 493, 98], which is V. astivalis — But you
must mean 357 = V. rupestris Lindh. — for
Schule says the leaves are perfectly glabrous
and the berries "erbsengrosse" — as large as peas, only.

I despatch this — without having time
to write more at present — Have you yet
got the proceeds of my remittance to Putnam
N. York for Kinnan?

Prof. Harvey of Dublin, the algologist, is now with me
a fine-hearted man, for a while. — Yours cordially

November 7th 1849 -

I have yours of Oct. 26, yesterday.
Thanks for the remarks on the oaks. —
I ~~wait for~~ want those Plants of Gregg, which I
am at work at Lindheimer — Hope to get
them soon.
The Parnia cultivated — with this year flat
made smaller flowers than the wild specimens;
but is the same:
The Arenda is my A. hastata, — cult. this
year from Texan seed it made as large flowers
as the same species from Hanbury Garden seeds,
and is every way the same,
The other fragment returned = some Symphori=
carpus, evidently.
Where were Gregg's (new) Plants collected. ~~We shall~~
We shall have to pay back the $100 to Nuttall,
I fear, unless Fendler showed gr to Salt Lake.
I dont care whether he does — I sale of Plants
is so slow.
I mean to take the best set
of Pls I can on hand (here — & give it
to Bentham — (who says he is too poor to buy
Plants!!) — will remit the amount if I do.

Send me a goodly number of blanks of Pl. Lindh.
as you propose — I often have two plants
which will occur under the same number.

Give me copy for Portulacaceæ —
I have cultivated the Talinum you speak to
portulacoides —

I have the Flaveria ~~elo~~ chlorefolia
from Rio Grande, Wright — so you need not
send back to me your specimen — as you kindly
propose — I think I took a bit from it.

Now as to your letter, The Boston P.M.
says it does not rest there. — — that it is
either in the St. Louis office — or is one of a few
which (although unpaid) be sent forward
about that date, — losing the Amer. postage
to save disappointment. —

Now as to Schaele. After reading thro' him up
to Lepuminoseæ — following your steps. I to-day get
two more nos. — with more abominable stuff of the
same kind. — more Compositæ too — all wrong.
Unfortunately all preoccupied. I believe. (Your ~~Scaphandria~~
Euphorbiaceæ too. I believe.
I send you Sullivant's copy (Return to S. when you are
(by mail — with this)

Explanation

Indigofera Lindheimeriana. Scheele = C. Aust. B. &c.
which I have from Texas. Wright. — also S. Carolina.

Eysenhardtia. Except that the Texan
has the style less curved at the apex. I can
see not real difference. I find the vexillum
often emarginate.
I have appended the characters of your C.
& the Eysenhardtia with different from both.
Spinosa.

380 I do not like the name Cassia Vespertilio — for
this — not very applicable — so I call it C. Lindheimeri.
I have long had it from Wright too. —

124 Nictitans N. Mex. = one of Gray's — Gregg's — also from
Rio Grande, Wright. = C. bauhinioides. n. sp.

412 (1047) "Cassia minima" name Precatorial. —
I call it C. pumilio. — I have it letter from
Wright.

Give your determinations. I think I will send
to Schlechtendal a list of real names by
side of Scheele's abortions. — & ask him to
give with it. admit no more of it into Linnaea.
I write in the midst of a great jabber on
every side. — very much distracted
Send on the Prairie Plants of Fendler for Lowell,
& course. — In haste. Yours very truly
A. Gray

MISSOURI BOTANICAL GARDEN

Rec'd Dec 17th
Ans Dec 21

Cambridge, Decr. 6. 1849.

Dear Engelmann.

The box by Adams Express reached me at Lowell - to-day - $10.50 charges to Cambridge - Never mind. I will get part from Lowell. (Lowell is sick now. but is getting better - will see him soon.)

Other things have prevented me from getting on further with Lindheimer's. Fr. Pl. since I last wrote you - I have to-morrow to examine Malvacea 412. but suppose it an Abutilon. - I think these clavate - truncate stigmas are not rare - in the kind. I have got through to end of Onagracea - having already done Compositæ - have hopes to look over them last to advise some new spp. in the Linnæa I set you - Scheeles curæ posteriores - such as making a new genus of Habea Texana - a new sp. of Engelmannia - etc. -

I now only want your MSS. of Portulacaceæ, & Cactæ as collated by Scheer not numbers right, & then I must do as far & with Euphorb as done - if Nat. Hist. Society are ready. I must then stop a little. At least I must visit evenings at the new ed. of Just Bot. & at the Patent Office for Report on Trees. - But will try to go on with the Flora & Lindh. Manuscript. Family together. - & soon Wrights coll. may be here, for he is on his way back from El Paso. - Greggs there as Scheer we notice there may come in along with Wrights lot. - The Pl. from Lindheimer, Engm. does not allow so much room & the Bost. Society cannot give unlimited space, as with Academy - & Smithsonian. Besides the Plantæ Nicotianæ may have some plates, as Henry will pay the expense. I shall of course send Portulac. Cactaceæ & Euphorbiaceæ all your pets to you. - I feel dreadfully with the amount of work on my hands. - winter coming on. & so little -

almost nothing done yet.

I wish you could see my notes Linsley before they are printed. — But they are bulky — on thick paper — & written in my open hand to be plain for the printer. — So I see not how they can be transmitted to you. Thanks for the acorns & the fine specimens of oaks — & instructive. — Shall go to work with you.

Mr Dexter Lowell will willingly pay $30 for the Gregg Plants, if you choose. — I will take a large part of the charges on box from St. Louis to Boston. — Shall I collect of Lowell for you — or have you funds this yr in your hands. — Let me know, and I will act accordingly. — If we could, it would be well to present them to L. —

I sounded Lowell, & find he would still be willing to patronize Fendler — for another trial. He could get no more from Mettauer, I fear; but could then not have to spend the $100. — From Smithsonian I could get $100 this yr & 100 next.

I have written a very strong letter to Brown — (who was in Ireland at last accounts) to send on the cash for Fendler — I think he can neglect no longer — but he is a slow & indolent old sinner.

I have just taken one of the two sets of Pl. Fendl. still left me on sale — 200 specimens & sent it to Bentham — tho' I can very ill afford it — You may draw on me for the amount $20 — or wait, as you please, till I get from British Museum & then I will remit altogether.

I send your Receipt for Gillimans. Journal — 2 years 1848–9 $10.00 — which I have paid. If you need be satisfied let it go against two sets of Gaya's Illinois collection, which I have taken & given to correspondents on the continent. — Yours ever.

A Gray

Engelmann

Acacia Roemeriana — must be 409, 604, 387 (Linn 386) — and Schulz wrong as to the "flores nisi" — In other respects it agrees. — I shall suspect that it is actually described from Lindheimer's specimens.

Send along a pretty good set of Lindheimer's plants — which I will buy, & give to Barthan, whom I wish to gratify for good reasons. — She says he is now unable to buy any plants.

The names on the labels, — such as "Anathera pernolata var. pinnifolia" &c — are they yours or Lindheimer's?

Dec. 7. 1849.

Dear E.

I was crazy last night in saying to you that 412 was probably an ~~Apt~~ Abutilon — It is no doubt a Sphaeralcea.

Knotia — in Sp. nov. Hook. Bot. Misc. 2
in ann. Sci. Nat. Ser. III. 1849 — pag 2
Salicia pro Tet. Euphrasiaceae — 2

S. spathulatus. — (§ Eusphaera) caulis virgatus. 1½ lin. longa.

S. annabalis — (§ Eriantha) 4. Calycibus pubescentibus, limbo villoso-fimbriato. caulis arcuatus.
(an. S. pitcheri!)

What are these?

Also a Veronica pulchella — Fruticosa, erecta —
= V. Engelmanni. I think.

Is it Phoradendron

Viscum 100 (1846) & 523 (1845)
flavescens? v. P. obiculatum?

Decr. 14. 1849.-

Dear C. I have now collated with Lowell's
sets through the Compositæ - & enclose a Schedule
as they stand - for printer. - Note that the proper series - has the regular numbers.
as 319 - to 448.

Those of later coll. I intercalate in ( ) -
also those of former publication when redistributed. ( )
Those not distributed which I have occasion to mention
are merely marked +

Please send localities &c - of those of later coll.
marked ( ), as of many I have no indication of it.
Also send Portulaceæ -

Yours in haste

A. Gray

Rec Dec 26 11

Cantwell Dec 15.

Cambridge Dec 12. 89

If you will now send Portulacea —
Loasaceæ. I can now ready
Cactaceæ — to print from Ranunculaceæ to Compositæ, inclusive.
And I hope to be through
by the time the printer is upon me —
I am to write to day to the Pat. Com. & the
Bot. Nat. Hist. Soc'y. — to see if they are ready
to print now.
I want the localities &
the plants as far as distributed to Lowell. Wasc. IV.
For I do not like to separate the plants of each
family into 2 sets. — ~~I will be less~~ It scatters
my remarks &. too much. — It will be less trouble
to intercalate the higher orders as we go on as
now

325. Vesicaria Engelmannii.
(576). V. Engelmannii β. elatior, racemo fructifero extenso
3-4-pollicari. V. pulchella, Kunth & Bruché — etc. — —
And any not ~~counted~~ distributed are
will just either in notes at bottom — or rather
in their place with a + instead of a No. —

I am this morning to collate my MSS. & Mass
with Lowell's sets. — ——
